The folks at NYU's Furman Center for Real Estate and Urban Policy spend much of their time crunching housing-related numbers. Now, so can we! The Furman Center has just launched the **Subsidized Housing Information Project (SHIP)**, a [map and database](#) of **235,000** affordable rental units in New York City, with info pulled from about 50 different sources. One key use of the site: tracking properties where subsidies from Mitchell-Lama, HUD, or other affordability programs (the site [has a directory](#)) are **soon to expire**. As of now, Team Furman has identified 227 such properties where subsidies will expire by the end of 2015. Properties are also searchable by number of violations and liens. [Click through](#) for tutorials and data-generating fun.
