

Chapter 7. Property Tax Delinquencies

Property tax delinquencies provide another indicator of the economic health of New York City's housing stock. The data presented in this chapter are derived from the Open Balance File (OBF) and Real Property Assessment Data (RPAD), provided by the New York City Department of Finance. Statistics are presented separately for properties in tax class 1 and tax class 2. Class 1 includes primarily residential one-, two-, and three-family homes (including condominium buildings of three units or fewer). Class 2 includes all other primarily residential properties not in tax class 1, such as larger apartment buildings, condominium buildings and cooperative buildings. A property is considered delinquent if the tax payment is not received by the due date. For the purpose of this report, however, *only balances of more than \$500 are counted as tax delinquencies*. Small delinquencies (i.e., those under \$500) are not likely to reflect economic problems with a property. The number of these small delinquencies tends to change substantially over time, and they more likely reflect the day-to-day fluctuations of the city's collection system rather than the financial strength or weakness of residential properties.

In 2003, 4.0% of class 1 properties were tax delinquent, a decrease from the 2002 rate of 5.2%. The rate of class 1 tax delinquency was highest in 2003 in Manhattan (6.1%), followed by Brooklyn (4.8%), the Bronx (4.6%), Queens (3.5%) and Staten Island (3.1%) (Borough Table 7-1).

In 2003, 1.8% of the class 1 properties in New York City had tax delinquencies that were one year or more past due. This represents a decrease from 2002, when 2.7% of class 1 properties were one year or more past due. Class 1 tax delinquencies of one year or longer were most common in Manhattan (3.1%), followed by Brooklyn (2.3%), the Bronx (2.2%), Queens (1.5%) and Staten Island (1.3%) (Borough Table 7-1).

Source: NYC Department of Finance

The community districts with the highest rates of class 1 tax delinquency of one year or longer in 2003 were Manhattan's Washington Heights/Inwood (7.5%), Central Harlem (7.2%) and Morningside Heights/Hamilton (7.2%), Brooklyn's Crown Heights (6.8%), and Highbridge/Concourse in the Bronx (6.3%). The community districts with the lowest rates of class 1 tax delinquency of one year or longer in 2003 were Bayside/Little Neck (0.7%), Flushing/Whitestone (0.8%), Rego Park/Forest Hills (0.9%) and Ridgewood/Maspeth (0.9%), all located in Queens, and Bensonhurst in Brooklyn (0.8%) (Exhibit 7-1).

Class 1 tax delinquencies of 50% or more of the property's assessed market value also declined, from 1.9% of all class 1 properties in 2002 to 1.5% in 2003. The highest percentage of class 1 tax delinquencies of 50% or more of the property's value in 2003 was in Manhattan (3.1%), followed by the Bronx (2.0%), Brooklyn (1.8%), Queens (1.3%) and Staten Island (1.1%) (Borough Table 7-1).

While the percentage of class 1 properties that are delinquent decreased from 2002 to 2003, the dollar amount of these tax delinquencies generally increased. In 2002, the median lien value was \$73,589; in 2003 it was \$92,010. (Note that median lien delinquencies are calculated using only data for those properties that have tax delinquencies over \$500.) The highest median lien value in 2003

was in Manhattan (\$130,941), followed by the Bronx (\$100,902), Queens (\$98,118), Brooklyn (\$90,514) and Staten Island (\$71,114) (Borough Table 7-1).

The median lien to value ratio of class 1 properties with tax delinquencies, which is simply the lien value divided by the assessed property value, also increased from 2002 to 2003, from 0.28

to 0.32. In 2003, the highest median lien to value ratio of class 1 tax delinquent properties was in Manhattan (0.51), followed by the Bronx (0.41), Queens (0.33), Brooklyn (0.31) and Staten Island (0.27) (Borough Table 7-1). Among community districts, in 2003 the highest median lien to value ratios of class 1 tax delinquent properties were all found in Manhattan: Washington Heights/ Inwood (1.37), East Harlem (0.81), Morningside Heights/ Hamilton (0.65), Clinton/ Chelsea (0.63) and Central Harlem (0.60) (Exhibit 7-2).

Beginning in 1996, the City of New York instituted a policy of selling property tax liens as a means of compelling delinquent property owners to pay their arrears. The Commissioner of Finance is permitted to sell the tax liens of properties that have tax arrears, but are not distressed. For those properties that are distressed, in addition to possessing large tax arrears, DOF can initiate an *in rem* foreclosure proceeding that will require the owner to pay the taxes on his or her property. If the taxes are not paid the tax liens are sold to an authorized third party (the "lienholder"), who then has the authority to col-

lect the taxes that were previously owed to the City. The lien sale includes all monies owed to the City (i.e. unpaid real estate taxes, or water, sewer or other property-related charges, as well as the interest due on these taxes and charges), although in order for a lien to be sold there must be property tax arrears. If the taxpayer still does not pay the outstanding balance, the lienholder has the right to begin a formal foreclosure proceeding.

For class 1 properties, there must be a property tax delinquency of three years or more for the lien sale to take place. For class 2 properties there must be a property tax delinquency of one year or more for the lien sale to take place. Lien sales are indicative of economic problems in an area's housing stock and are potentially more serious than tax delinquencies, since the lienholder may be more likely to foreclose than the City.

In 2002, there were 192 sales of liens against class 1 properties; by 2003, this number had increased substantially to 870. In 2003, 0.13% of all class 1 properties had a tax lien sold by the City of New York. Class 1 properties in Brooklyn had the largest number of lien sales, 366 (0.18% of all class 1 properties in Brooklyn), Queens had 330 lien sales (0.12%), the Bronx had 97 lien

The number and percentage of foreclosures are significantly higher than those from previous editions of the report, due, in part, to a change in data collection. In the current edition, we include all properties that have had a foreclosure judgment, whether the foreclosure process is active (i.e., ongoing) or closed as of the end of May 2004, whereas in previous editions we included only properties with active foreclosures (as of the date the data was received).

sales (0.16%), Staten Island had 73 lien sales (0.07%) and Manhattan had 4 lien sales (0.07%) (Borough Table 7-2).

According to data from the lien sale management firm, of all the class 1 properties that have had liens sold by the City of New York since 1996, 41.25% are still in collection, 41.60% have been redeemed, and 17.15% have had a foreclosure judgment entered against them. The largest percentage of cumulative lien sale foreclosures has been in Staten Island (20.18%), followed by Brooklyn (17.15%), Queens (16.67%), the Bronx (16.63%) and Manhattan (14.69%) (Borough Table 7-2).

The community districts with the highest cumulative rates of foreclosure of

class 1 tax lien sales are Kingsbridge Heights/Bedford in the Bronx (34.48%), South Crown Heights/Prospect in Brooklyn (28.09%), St. George/Stapleton in Staten Island (26.67%), Brooklyn's Brownsville (26.53%) and Highbridge/Concourse (26.19%) in the Bronx (Exhibit 7-3).

In 2003, 7.8% of class 2 properties (i.e., larger apartment buildings, condominium buildings and cooperative buildings) were tax delinquent. This is a slight decrease from the 2002 rate of 8.9%. The rate of class 2 tax delinquency in 2003 was highest in Brooklyn (11.1%), followed by Staten Island (10.3%), the Bronx

(8.4%), Manhattan (6.3%) and Queens (5.6%) (Borough Table 7-3).

In 2003, 3.7% of the class 2 properties in New York City had tax delinquencies that were one year or more past due. This rate represents a small decrease from 2002 when 4.9% of class 2 properties were one year or more past due. Class 2 tax delinquencies of one

year or longer were most common in Brooklyn (5.3%), followed by the Bronx (4.7%), Staten Island (3.0%), Manhattan (3.0%) and Queens (2.4%) (Borough Table 7-3).

The community districts with the highest rates of class 2 tax delinquency of one year or longer in 2003 were Belmont/East Tremont (12.4%) in the Bronx, Manhattan's Morningside Heights/Hamilton (12.1%), and the Bronx's Hunts Point/Longwood (11.6%), Morrisania/Crotona (11.5%) and Fordham/University Heights (11.1%). The community districts with the lowest rates of class 2 tax delinquency of one year or longer in 2003 were Throgs Neck/ Co-op City in the Bronx (0.9%), Brooklyn's Bensonhurst (1.4%), Manhattan's Financial District (1.5%), and Rego Park/Forest Hills (1.5%) and S. Ozone Park/Howard Beach (1.7%) in Queens (Exhibit 7-4).

The number of class 2 tax delinquencies of 50% or more of the property's value also fell, from 4.4% of all class 2 properties in 2002 to 3.6% in 2003. The highest percentage of class 2 tax delinquencies of 50% or more of the property's value in 2003 was in Staten Island (8.5%), followed by Brooklyn (5.5%), the Bronx (3.8%), Manhattan (2.8%) and Queens (2.2%) (Borough Table 7-3).

Unlike the case with class 1 properties, the value of class 2 tax delinquencies for the city decreased from 2002 to 2003. In 2002 the median delinquent amount was \$78,518; in 2003 it was \$71,291. (Note that median delinquencies are calculated using only data for those properties that have a tax delinquency of \$500 or more.) The highest median lien value in

2003 was in Manhattan (\$87,174), followed by Brooklyn (\$75,266), the Bronx (\$74,151), Queens (\$44,964) and Staten Island (\$24,709) (Borough Table 7-3).

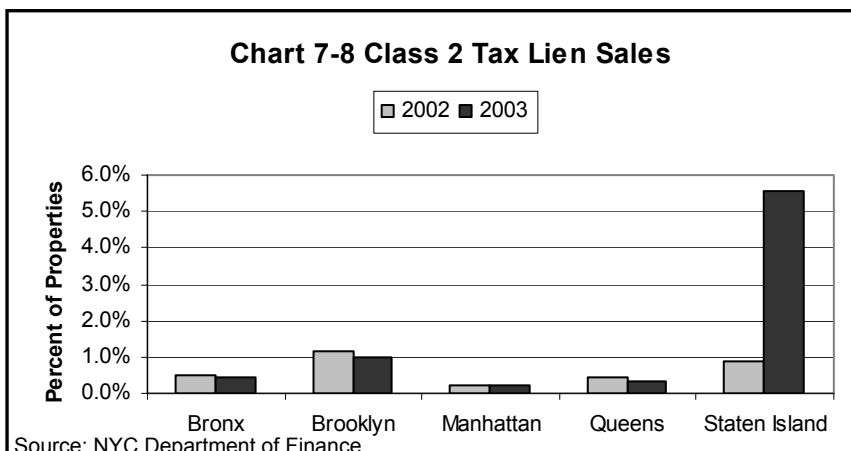

Similarly, the median lien to value ratio of class 2 properties fell from 0.50 in 2002 to 0.42 in 2003. In 2003, the highest median lien to value ratio of class 2 tax delinquent properties was in

Staten Island (1.55), followed by Brooklyn (0.49), the Bronx (0.36), Manhattan (0.35) and Queens (0.22) (Borough Table 7-3).

Among community districts, in 2003 the highest median lien to value ratio of class 2 tax delinquent properties was found in Staten Island's Tottenville/Great Kills (3.38), followed by St. George/Stapleton (1.55), also in Staten Island, the Bronx's Parkchester/Soundview (1.47), Manhattan's Central Harlem (1.42) and Staten Island's S. Beach/Willowbrook (1.26) (Exhibit 7-5).

In 2002, there were 968 sales of liens against class 2 properties. In 2003, this number rose to 1,039. In 2003, 0.55% of all class 2 properties had a tax lien sold by the City of New York. Class 2 properties in Brooklyn had the largest number of lien sales in 2003 with 459, Staten Island had 215 lien sales, Manhattan had 170, the Bronx had 104, and Queens had 91 (Borough Table 7-4).

The community districts with the largest percentage of class 2 properties with lien sales in 2003 were Staten Island's St. George/Stapleton (10.62%), Jamaica/Hollis in Queens (2.38%),

The number and percentage of foreclosures are significantly higher than those from previous editions of the report, due, in part, to a change in data collection. In the current edition, we include all properties that have had a foreclosure judgment, whether the foreclosure process is active (i.e., ongoing) or closed as of the end of May 2004, whereas in previous editions we included only properties with active foreclosures (as of the date the data was received).

Brooklyn's Crown Heights (2.19%) and Bedford Stuyvesant (2.06%), and Rockaway/Broad Channel in Queens (1.82%). The community districts with the smallest percentage of class 2 properties with lien sales in 2003 were Flatlands/Canarsie in the Bronx (0.00%), Manhattan's Greenwich Village/Soho (0.05%), Queens' Ridgewood/Maspeth (0.05%), Manhattan's Financial District (0.06%) and Rego Park/Forest Hills in Queens (0.08%) (Exhibit 7-6).

Of all the class 2 properties that have had liens sold by the City of New York since 1996, 42.89% are still in collection, 42.44% have been redeemed, and 14.67% have had a foreclosure judgment. The largest percentage of foreclosures has been in the Bronx (19.94% of class 2 properties with lien sales), followed by Queens (17.07%), Brooklyn (16.56%), Manhattan (9.86%) and Staten Island (3.87%) (Borough Table 7-4).

At the community district level, the highest class 2 lien sale foreclosure rate (for buildings with sold tax liens) was found in Queens Village in Queens (48.00%), the Bronx's Fordham/University Heights (39.66%), and Jamaica/Hollis (38.60%), Kew Gardens/Woodhaven (31.58%) and Hillcrest/Fresh Meadows (29.41%), all located in Queens (Exhibit 7-7).
